Label the map of the solar system.

Define the following terms.

- Star
- Planet
- Satellite

Look at the image and answer the following questions.

a) What is the movement that the Earth makes around its own axis?

b) How long does it take to go around once?

c) What is the main consequence of this movement on Earth?
4 Write down what season each image corresponds to and the month it begins.

<table>
<thead>
<tr>
<th>Season</th>
<th>Month</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

5 What is the phase of the Moon in each of these images?

-  
-  
-  
-  

6 Match each term with the appropriate definition.

- Galaxy: Where the solar system is located.
- Telescope: A collection of stars and planets.
- Milky Way: Instrument used to observe outer space.
